Structured Project Management

## How IT Automated Provide it:

- Packages that meet and surpass the expectations for modern entertainment systems.
- Straight forward upgrade path from good to better and best systems.
- Quality brand name systems that are, easy to use, simple in operation and reliable.
- Dedicated designer/sales person for your company to help your sales and offer you managed packages or full turnkey solutions

## Added Value:

- A-CAD Floor plans with pre-determined device locations for all the standard and optional items with consideration for future system expansion. These drawings are used to clarify the final design with the customer.
- IT Automated brand option selection forms make the package selection very simple. These forms spell out the equipment specification and pricing included in the package.
- A project design specification which includes selection forms, drawings, bill of materials and brochures are used to describe the system, spelling out the actual products, benefits and upgrade paths.
- IT Automated solutions increases the value of your buildings.
- Once project is in process regular Design Review meetings are held.
- Unique engineering team with many years of experience providing solutions for a high volume production environment, ensuring a right first time philosophy. We are CEDIA, Konnex, Axis and Milestone certified.
- Structured project management techniques to co-ordinate a "on time" successful project realizations. We use CDM procedures to ensure a safe site and working practices.

We want you to feel confident that we can deliver and exceed expectations.

We look forward to work with you soon.

**Grahame Edwards** – Technical Director
